Capability Assessment and Advanced Online Support

The Spare Parts Management Capability Assessment is a practical self-assessment tool that helps you identify strengths, gaps, and improvement priorities in your spare parts management practices.

If you have a question about *anything* relating to the application of our content OR your spare parts inventory management then you can email us your questions. We will provide a prompt response guiding you to the right answer.

This is your exclusive opportunity to tap into Phillip Slater's extensive know-how and experience for personal support and advice on your specific spare parts management issues.

Who is it For?

The Practitioner Playbook is for people and teams who need to solve real spare parts management problems.

It is suitable if you:

- Are responsible for improving spare parts inventory performance
- Need access to deeper resources, tools, templates, and guidance
- Are leading or supporting a spare parts improvement initiative
- Need to review policies, stocking decisions, critical spares, or inventory settings
- Want a reference base you can return to when specific issues arise
- Need to make decisions, not just complete a course
- Want the most complete content access available
- Need to build consistent spare parts decision-making across your organization

This Playbook is for people and teams who want to move from learning about spare parts management to actively applying it.

The Practitioner
Playbook is not a
program to complete.

It is a resource to return to
whenever there is work to be
done.
